

COVID-19

Monoclonal Antibody Treatment

for the Immunocompromised

Do you know about **EvuSheld**?

"I've had covid twice, and each time, I didn't have antibodies afterwards, so that probably meant I would be getting it again... After getting EvuSheld, testing finally came back positive!" - M.K. a patient of gerstenberg.clinic.

EvuSheld has been issued an EUA for the emergency use by the FDA for the **pre-exposure prophylaxis of COVID-19** in adults and pediatric individuals (12+ years).

- Who are not currently infected with SARS-CoV-2 and who have not had a known recent exposure to an individual infected with SARS- CoV-2 and
- Who have moderate to severe immune compromise due to a medical condition or receipt of immunosuppressive medications or treatments and may not mount an adequate immune response to COVID-19 vaccination or
- For whom vaccination with any available COVID-19 vaccine, according to the approved or authorized schedule, is not recommended due to a history of severe adverse reaction to a COVID-19 vaccine(s) and/or COVID-19 vaccine component(s).
